

HVU capsules offer several advantages vs. injectable mortars in terms of usage...

- HVU is **pre-dosed** and ensures the right amount of mortar is used
- HVU allows for almost **instant loading**
- HVU requires **less cleaning accessories** (no brushing required)
- HVU is well **suited for overhead applications**
- HVU offers **high flexibility in terms of transport & storage temperature**
- HVU offers **long shelf-lifetime** (18 months)
- HVU is perfectly **suited for OEM business** (pre-packed, precise dosing, transport and storage conditions)

... and especially vs. competition capsule offerings

- HVU is **much easier to handle on jobsite** since it cannot break like a glass capsule and it is easier to bend in uneven boreholes
- HVU allows you to apply an **increasing factor for calculations in high-strength concrete**
- HVU provides the **best safety factor** possible (Gamma 2 of 1,0)
- Hilti offers a **wide range of services** along with the product
